

Online Planroom Tips & Tidbits

RATE PROJECT INTEREST (and filter based on those ratings)

Now you can rate your interest level for individual projects - "Yes", "No" or "Maybe" - and then filter the 'Browse Bidding Projects' list based on your ratings.

From the Browse - Bidding Projects window, the important things to note are the "Show" area (where you apply the filter based on your ratings) and the magnifying glass in the Project Name field.

Clicking the magnifying glass for a project opens a window that shows the entered description (when available) and includes three boxes - clicking one highlights the job with that color in the Browse list and allows it to be filtered based on that selection. Clicking "Save this project" saves the project to your "My Desk". Click "Close" when done.

To filter the Browse list based on your ratings, click any of the options next to "Show". (shown in first picture)

To clear a rating, go into the detail page for the project and click "clear".

You can also choose your rating from within the detail page.
